

HUNTER EQUIPMENT

Hunter Engineering Company designs, manufactures and sells a wide range of passenger car and truck service equipment including:

- Computer-based wheel alignment systems
- Vehicle inspection systems
- Wheel balancers
- Brake lathes
- Tire changers
- Vehicle lifts

Hunter's award-winning research and development team of mechanical, electrical and software engineers is responsible for hundreds of patented and exclusive features that make Hunter products the most productive under-car service equipment available.

Hunter is a primary supplier in major car and truck manufacturer dealership equipment programs and is the recipient of many OEM supplier awards. It has been chosen for use at OEM production, research, testing and training facilities, including Chrysler's Chelsea Proving Grounds, Ford's Experimental Vehicles Building, General Motors' Milford Proving Grounds, and VW/Audi's Auburn Hills headquarters. Hunter heavy-duty brake testing equipment is the choice of the U.S. Army Logistics Command.

Since 1946, when Automotive Hall of Fame inductee Lee Hunter founded Hunter Engineering, the company has built a reputation for innovation and visionary leadership in the application of the newest technologies to automotive under car service.
